

Special Guest:

George Condous
Melbourne

Luca Savelli
Forlì

Course Directors:

Marcello Ceccaroni
Negrar (Verona)

**21TH GENNAIO
2022**

**09:00 AM 17:00 PM
(CEST)**

**LIVE CONFERENCE ON ULTRASOUND IN ENDOMETRIOSIS
WITH LIVE SCANNING SONOGRAPHIC SESSIONS
AND RECORDED LAPAROSCOPIC SURGERY**

**CANTINA VALPOLICELLA NEGRAR
Via Cà Salgari, 2 - 37024**

NEGRAR DI VALPOLICELLA (VR)

**Evento Residenziale
e in Diretta Streaming**

PROGRAM

- 09.00** Introduction
L. Savelli (Forlì), M. Ceccaroni (Negrar)
- 09.30** Normal pelvic anatomy: sonographic features of bladder, ureters, parametria, rectum, rectovaginal septum, uterosacral ligaments
A. Stepnewska
- 10.00** Sonographic features of Deep Infiltrating Endometriosis (DIE) of the posterior compartment
E. Fontana
- 10.30** How to diagnose parametrial endometriosis
C. Zorzi
- 11.00** Sonographic features of Deep Infiltrating Endometriosis (DIE) of the anterior compartment
L. Savelli
- 11.30** How to access to the retroperitoneum, and open spaces at laparoscopy
G. Roviglione
- 12.00** How to isolate the ureters and perform ureterolysis
M. Ceccaroni
- 13.00** Evidence-based management of endometriotic ovarian cysts
G. Condous
- 15.00-18.00** **LIVE SCANNING:** the whole spectrum of findings. Expert tips and tricks revealed

SCIENTIFIC RATIONALE

In the last two decades, transvaginal ultrasound has consolidated its role in modern gynecological diagnostics, so much so that it has become an irreplaceable tool in the management of numerous pathological conditions. In the field of endometriosis, transvaginal ultrasound has radically revolutionized the diagnostic process and management of patients, allowing for an accurate, early, economical and non-invasive diagnosis. We wanted to organize this course by organizing a complete program on a topic of great interest, combining the skills and experience of specialists who for years have distinguished themselves for great clinical experience and communication skills. The theoretical course will be enriched by the transmission of live ultrasound examinations and live laparoscopic surgery sessions from the hospital operating rooms, in order to compare the ultrasound aspects with the anatomical ones.
